

## Buzzers

AC operated Buzzers are available for audible signaling in small office areas or classrooms. The buzzers have a sound pressure of 75 db at normal coil voltage. The tone emitted from the buzzer is 120 Hz when operated from a 60 Hz source and 100 Hz when operated from a 50 Hz source. Buzzers are available to operate at 120 vac or 24 vac. Nominal coil power requirements are 4.6 VA. The buzzers come equipped with 12 inch wire leads and mounting hardware. They are normally mounted in a clock housing or in the clock wiring outlet box.
