

# DIGITAL WIRELESS CLOCKS

MidWest Time Control's Digital Wireless Wall Clocks are designed to receive the wireless data transmitted from the WIC-100 Wireless Interface Clock and Master Clocks with the wireless option. They are highly accurate electronic clocks with 100% solid state circuitry, no moving parts to wear out. The Time is shown on a 4 Inch Red LED display (Seconds Characters are 2.3 inches).

The clock is enclosed in a high impact ABS plastic housing. The Clocks are surface mounted on a single or double gang outlet box. For use in hallways, a Double Dial Hanger Bracket is available. The display should be visible under normal lighting conditions from distances exceeding 100 feet.

The clock timing is line synchronous for long term accuracy.

The Digital Clocks can also retransmit the time to other clocks on the system. This allows the system to be expanded without adding expensive transmitters.

## Standard Features

- \* Four Digit Red 4 inch LED Display
- \* Line Synchronous Timing - 60 Hz
- \* Manual Time Set Buttons
- \* 12 or 24 Hour Display
- \* Mating Connector Supplied
- \* 115 VAC Power

## Optional Features:

- \* Six foot Line Cord
- \* Six Digits (Hours, Minutes, Seconds)

## Special Order Features (No Charge)

- \* Hours, Tenths, Hundredths Display
- \* Line Synchronous - 50 Hz
- \* 24 VAC Power

## Model Numbers:

- \* DWC-300-115 or DWC-300-24  
(4 Digit - Hours-Minutes)
- \* DWC-306-115 or DWC-306-24  
(6 Digit - Hours-Minutes-Seconds)

## Specifications

Operating Power ..... 115 VAC 60 HZ 5 VA  
(24 & 230 VAC and 50 HZ Available)

Weight ..... Approx. 3 Lbs.
