

Midwest Time Control manufactures a full line of Master Clocks and Secondary clock for use in schools, hospitals, manufacturing facilities, banks, offices, or anywhere a synchronized system is needed. These systems are designed to interface with most other clock systems on the market. The digital clocks may also be used with most Time & Attendance systems available. Computer interface is available to interface the clock system with a computer system for time synchronization with other functions.

Master Clocks

2, 4, & 6 Circuit
Secondary Clock Correction
Optional computer interface
Wall Mount or Rack Mount

Analog Clocks

Wired-Synchronous
Minute Impulse

Digital Clocks

2.5 or 4 inch Display
4 or 6 digit
Sync-Wired
Minute Impulse
RS485
Independent

NIST Telephone Modem Clock

Receive NIST Time & Set Time on
Master Clock, Computer, or Digital
Clocks

A **GPS Antenna** is also available
for Master Clocks to receive
NIST Time
