

Update.exe Part No. 900016-02

The Update Software corrects DRC series Digital Clocks to the computer time.

Copy the software to the computer hard drive. A desktop shortcut can be created if desired. The software can be included in startup if it is desired to have the program running at all times.

There are 2 items to set up on the software.

1. **Serial Port Settings** - This sets the Com Port used on the computer. The BAUD rate should be set to the same setting as the Digital Clocks. Default is 9600 which should work in most applications.
2. **Update Frequency**
 - Every Minute - The Digital Clocks will be updated every minute.
 - Every Hour - The Digital Clocks will be updated every hour
 - Every Day - The Digital Clocks will be updated every day at 6:00 AM
 - On Start Up - The Digital Clocks will be updated when the computer is initialized.
 - Manual Only - The Digital Clocks are updated when the Synchronize Now button is selected.
