

Radio Controlled Clock

Synchronized to the U.S. Atomic Clock

This precision quartz clock contains a radio receiver that monitors the Time Signal broadcast from Fort Collins, Colorado. This signal allows the clock to self-correct to the exact time according to the National Time Standard. After the time zone is set and the battery installed, the clock will automatically set to the proper time. The clock will also adjust for Daylight Savings Time.

The clock is housed in a high impact ABS plastic case (Black or Gray) with a glass crystal. Dial is 12 inch Diameter. Requires one "AA" battery.

Part Numbers:

ASC-WWV-S21 (Black)

or

ASC-WWV-S31 (Gray)
